

## Dedicated Internet Access – T1, Bonded T1, and Private Line T1

---

### Mission critical reliability and guaranteed bandwidth

Businesses that demand the highest uptime reliability in commercial Internet services can benefit from mission-critical T1 service, which carries 99.99% uptime guarantees and a Service Level Agreement.

If your organization cannot be without access for even a short amount of time, your needs are considered to be mission critical. T1 service provides low-latency, high quality bandwidth to your network and can be combined with other MegaNet services such as Digital Voice to provide a comprehensive communications package.

As your business grows and a single T1 line no longer meets your needs, Bonded T1 Service with configurations from 3 to 12Mbps can provide higher bandwidth with the same reliabilities and uptime you expect from T1 service. Bonded T1 is a cost effective option if Metro Ethernet services are not available.

### Reliable, Private Multi Site Connectivity

Multi-location companies can benefit from a fully secure and private Wide Area Network deployed over MegaNet T1 lines. Internal traffic stays off of the public Internet, and locations can each be connected to each other via private links, in addition to connectivity to the company's main location.

All T1 services from MegaNet include 24x7 proactive monitoring and managed routers – let us handle the connectivity and free you to concentrate on your business. Our multi-homed network will provide your traffic with the optimal routes and reliability expected of a mission critical connection.

## MegaNet Dedicated Internet Access Features

Dedicated access at speeds from 384Kbps to 12Mbps	Basic NAT Firewall Included	24x7 network monitoring from our Network Operations Center (NOC)
Choose flat or burstable rate plans	IP address space	Telecommunications provisioning
Free use of router	Real-time circuit usage monitoring	Hardware requirement consultation
Router configuration and maintenance	Knowledgeable 24x7 technical support - 888# toll free and local number	Simplified, easy-to-read billing statements
