

Dedicated Internet Access – Metro Ethernet

Reliable Fiber Based Connectivity with Guaranteed Bandwidth

Companies who use the Internet as a critical part of their business plan may need a larger bandwidth connection than T1 lines may provide. Metro Ethernet services continue to deliver the mission critical reliability and uptime of T1, with a larger bandwidth port to support larger Local Area Networks.

No matter what your bandwidth needs are, MegaNet has a service that will provide an exact fit for your business. Metro Ethernet offers speeds ranging from 10Mbps – 10Gbps and can be upgraded without any additional installations or wait times.

Prioritize Your Network Traffic with Ethernet Private Line

Metro Ethernet can also offer dedicated private connections between multiple locations for companies that need secure site to site Wide Area Networks. Variable bandwidth and guaranteed reliability will ensure that your network remains up and running for your crucial network needs.

Ethernet Private Line will benefit your network by providing one simple network to transport all of your Internet, voice and data traffic. Bandwidth ports can easily be upgraded, providing a truly cost-effective solution designed to fit your exact needs.

Metro Ethernet services benefit from our 24x7 proactive monitoring, multi-homed network, and carrier-class Service Level Agreements and guarantees.
